REQUEST FOR EXPEDITED ISSUANCE OF A CORRECTED PATENT

Pursuant to 37 CFR § 1.322(b) and MPEP § 1480.01, the undersigned requests a corrected patent.

Attached for convenient reference please find a copy of Form PTOL-85 received by USPTO on February 24, 2010. The Form PTOL-85 clearly shows the Attorney, Agent or firm to be:

Oppendahl & Larson LLP

Through the fault of the Patent and Trademark Office, the patent was issued with this on the front page:

(74) *Attorney, Agent, or Firm*—Oppendahl & Larson LLP

It will be appreciated that the prominence of the mistake (on the front page of the patent) is such that a certificate of correction would not be appropriate. It is thus requested that the Director issue a corrected patent in lieu thereof as a more appropriate form for certificate of correction, without expense to the patentee thereof. 37 CFR § 1.322(b).

Respectfully submitted,

/s/

U.S. PATENT DOCUMENTS

5,313,369 A 5/1994 Lewis et al.

A power supply unit controller for a rack enclosure in which a plurality of devices communicate via a backplane is disclosed. The controller reads signal(s) indicative of output supply level(s) being provided to the backplane by a power supply unit associated the power supply unit controller and stores value(s) associated with the signal(s). The controller further stores a scaling value associated with a respective signal and dependent on the power supply unit, and a power supply unit serial number. The controller is processor to a request from an SES processor to return a state of the associated power supply unit to the SES processor, the state including a combination of: a summary of the current status of the power supply unit, the value(s), the scaling value(s), and the power supply unit serial number, according to the SES processor request.
